

# DELIVERABLE REPORT

Project acronym: INPUT

Project number: 687795

## **Deliverable**                      **D2.1, Project Homepage**

Dissemination type:            R – report

Dissemination level:          PU

Planned delivery date:        2016-04-30

Actual delivery date:         2016-04-13

Reporting Period:              1

## **WP2, Task 2.1, Dissemination**

**Lead: OBHP**

**Disclaimer:** Company or product names mentioned in this document may be trademarks or registered trademarks of their respective companies.

This document reflects only the authors' view. The European Community is not liable for any use that may be made of the information contained herein.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 687795

## 1 DESCRIPTION OF THE TASK

Together with the partners, OBHP will investigate the possible intellectual property rights within this project. A patent review will be performed periodically and possible new patent applications will be investigated, identified and if suitable filed together with the partners. We envisage that mutual agreements about the created intellectual property will be setup between different partners, as will also be detailed in the Consortium Agreement. Once patent protection has been looked after and the consortium agrees upon dissemination of obtained results (cf. Figure 1 in Grant Agreement), publishing will be done through several activities that will be accurately planned and targeted to the different stakeholders.

- Project identity: The development of a common public identity for all public communication, including logo, presentation template and a general information brochure.
- **Website: Preparation, launch and continuous update of the project Website, which will be fed by all partners with contents and news about the progress of work including the motivation, objectives and methodology.**
- Scientific dissemination of the results: Suitable conferences and meetings mainly within Europe but also worldwide will be identified along with the most appropriate journals to publish results.
- Conventional communication channels: Contacts with the media (press, TV) will be organized to raise awareness of the civil society and inform the wide public about the progressive achievements of the project and the benefits it can take at societal level for amputees. Patients' association will be mobilized in this regard.
- Social networks: an extensive presence of the project in the most known social networks (Facebook, LinkedIn, Twitter) will allow to reach out the widest possible audience, including those stakeholders that are not directly involved as patients, relatives, carers, researchers, developers, etc. For instance, indirectly, they will raise attention and curiosity of young people and get them closer to engineering and scientific academic careers.

## 2 DESCRIPTION OF DELIVERABLE

The project homepage will make information on the project including participants, project duration, funding body and main achieved results accessible to the public.

## 3 IMPLEMENTATION & RESULT

A project webpage was set up and is accessible on the internet under the URL [www.input-h2020.eu](http://www.input-h2020.eu)

The main page is designed according to the EU-standards which include:

- the European Flag on the top of the page
- Grant Agreement Nr.
- an information that the project is funded by the European Commission

### 3.1 STRUCTURE OF THE WEBPAGE

#### THE MISSION

- description of the project goal
- previous projects from which INPUT benefits
- information that this project is funded by the European Commission

#### THE TEAM

- list of the consortium members/beneficiaries
- links to an introduction of every beneficiary (institution, persons involved in the action )

## THE OUTPUT

This is the place where the project's output/publications/results will be made available centrally to the public.

## THE SCHEDULE

A detailed schedule/timetable including:

- Work packages
- Milestones
- Deliverables
- Project Risks
- Consortium internal communication
- Report schedule to European Commission

## CONTACT

A contact form to get in contact with the project coordinator.

## NEWS

Brief presentation of the latest posts and updates.

## 4 SUBCONTRACTING

No subcontracting was needed – all work was done by OBHP.
